

## ASK COST SAVING PRODUCTS FOR SCO-UNIX / BBX SYSTEMS

### Paperless Reporting

As computer technology continues to advance, firms should be taking advantage of those features that improve efficiency and reduce operational costs. Far too often, information is relayed to customers and vendors in the form of standard computer printed reports. These reports are often forwarded to recipients by mail or fax which are both costly and time consuming methods.

With the emergence of internet access and email, BBx Application software can easily be modified to transmit documents and reports via simple email attachments.

ASK TECHNOLOGIES, INC. provides software that will allow you to redirect any selected report or invoice to an email attachment.

We provide options for:

- Users to email themselves
- Select any recipient from an email address book
- Attachments can be sent in a MS-Word, MS-Excel or html format
- All emailed reports fit on standard 8 ½ x 11 sheet paper

For more information, please contact us at (610) 617-0300.

#### About ASK

ASK Technologies, Inc. is a national provider of IT hardware, software and professional services. ASK provides our clients the ability to transform current information technology into productivity.
